

YANMAR OFFERS INSTANT REBATE PROGRAM ON ENGINE REPOWERS

There's no better time to repower. Helping to stimulate owners' boating passion, Yanmar Marine USA Corp introduces the Yanmar Instant Rebate on repowers, saving boaters up to \$1,700 per engine.

"We're happy to announce our own stimulus package in the form of an instant rebate for retail repower engine sales between June 8 and August 31, 2009," said special projects manager Greg Eck. "The plan is to give a pleasure boat customer who is thinking about repowering a reason to act now."

Putting money back in owners pockets, boaters simply visit their local Yanmar dealer and repower with a new Yanmar engine between now and August 31, 2009. The rebate will be deducted from the final invoice.

Every repower engine qualifies for the Yanmar Instant Rebate. Per engine, owners can save \$200 on the YM Series, \$300 on the JH Series, \$500 on the BY Series, \$700 on the LP Series, \$1,000 on the LY Series, \$1,300 on the CX Series and \$1,700 on the SY Series. This rebate is only available through participating Yanmar dealers/distributors in North and South America.

Yanmar Marine USA Corp is dedicated to its customers, clean boating and preserving the environment. The company offers an extensive range of recreational and commercial diesel engines from 9.1 to 900 hp.
