

PRESS RELEASE

August 2010

WeatherHawk, a division of Campbell Scientific Inc., is pleased to announce the acquisition of Speedtech Instruments' range of wind/weather meters, including the SkyMate, SkyMaster, and WindMate® product line.

The other Speedtech products--portable depth sounders, flow meters, and the EDGE hunting and fishing handheld computers--will continue to be marketed by Laylin Associates Ltd, formerly dba Speedtech Instruments. For information, see the website at www.laylinassociates.com or email David Laylin at dlaylin@laylinassociates.com, 703 430 8084.

WeatherHawk is a leader in manufacturing weather instruments for consumer, education, scientific and industrial applications; Speedtech's wind/weather instruments will expand their product offering. In the future, WeatherHawk plans to develop new wind meters with advanced, comprehensive features.

Speedtech/WeatherHawk will exhibit at the Annapolis Sailboat Show, October 7-11, and at the METS show in Amsterdam, November 2010. See the websites at www.weatherhawk.com and www.speedtech.com. For more information contact John Johnston at johnston@weatherhawk.com, 435 750 1830.
