Zodiac's New N-ZO 760 Model to Debut in North America Summer 2013

Summerville, SC – Z Marine North America, LLC, formerly Zodiac Recreational of North America, LLC, is debuting the flagship model of the NZO fleet in North America this summer: the **N-ZO 760**. This RIB is the largest in the N-ZO series at nearly 25' (24'11").

"This new model is stylish, seaworthy, spacious, and safe," said Z Marine Vice President of Sales Gary Durnan. "This will be a great addition to our North American line-up for our dealer network."

Italian designer Vittorio Garroni was tapped again for the boat design and its exclusive lines. Zodiac has seen great success from the N-ZO 600 and 680 models, and looks to repeat this success once again with the new 760.

The model showcases an **Air Console**, a higher console that minimizes floor space used and increases walk-around room in the boat making it safer and more convenient for passengers. Another feature enhancement on the N-ZO is the **Reverse & Sun**, an extensive sundeck that can be transformed in mere seconds.

The N-ZO 760 will sport deck LED lights, spacious aft seating and hydraulic steering. Optional features include a head, aft and bow sunbathing kit, refrigerator, aft and bow saloon table, fresh water tank, shower kit and bimini just to name a few.

Z Marine North America, LLC – the World's oldest and most recognized manufacturer of recreational inflatable boats, RIBs, life rafts and safety equipment and a subsidiary of global private investment firm OpenGate Capital - is an NMMA certified marine manufacturer with an extensive production, distribution and customer service operation throughout North America.
